

Espire Corporate Overview

We're a team of specialists, including veterans, first responders, and their families. Espire provides integrated global solutions for our valued government and civilian partners, delivering an uncommon advantage. Since 2008, our team of trusted experts has received numerous awards and commendations for delivering exceptional products and services to solve unique customer challenges. Espire builds scalable situational awareness platforms for our partners and provides dedicated experts in an array of professional fields for programs worldwide.

Mission

We seek enduring partnerships with elite clients who are facing critical challenges around the world. Our uncommon advantage was gained by building world-class teams from unrealized talent pools – to include military veterans, first responders, and their families.

Vision

We will be a leader everywhere our people, products and customers are deployed.

Values & Principles

Integrity

Our Services

Data Analytics

- Collect, aggregate, analyze, visualize and provide recommendations in support of any mission around the world
- 10+ years of field testing in conflict zones across Africa, South Asia, the Middle East, and Latin America
- Compute descriptive, inferential, and time-series statistics, natural language processing, and predictive modeling via machine learning and neural networks

Market Research

- Design and implement media campaigns, provide marketing analysis and recommendations
- 30+ years of political campaign modeling and execution
- Manage physical and virtual platforms for marketing research

Administrative Management

- Support operations and administrative management for our partners
- Deliver facility and construction management support services to our partners
- General management consulting services

Software Engineering

- Imagine, code, configure, test, and support software to meet the needs of our partners
- Utilize C++, JavaScript, HTML, Python, and R to create computer, mobile, and web applications
- Utilize scalable web-based applications to securely house data in robust and redundant repositories

Staff Augmentation

- Recruit and deploy qualified, clear professionals in a variety of expertise to match the needs of any program worldwide
- 10+ years of locating the right personnel to execute any objective
- Create opportunities and maintain a professional partnership
